Go to the sea front and look for a tower. There is a big ship at the top of it with the Yellow Torpedo in it. When in the sea, you have to activate the cannons on your ship by pressing them. If you press them at the wrong time, the cannons will explode, but if you hold them down, they'll shoot the balls. The balls can get up to a huge distance but the time it takes to get there depends on the wind. Be patient and wait for the balls to land. A certain car 82157476af
